

Te Kahu Park Christchurch

DATE: October 2014 - November 2014

CLIENT Bushnell Builders/ Christchurch City Council

PROGRAMME MET: Yes

NON-COMPLIANCE ISSUES: None

CLIENT REFERENCE: Chris Duncan - Site Manager Bushnell Builders

Walkspace recently completed a small project for the public of Christchurch with the supply of Christchurch City Council bike racks. Working with lead contractors Bushnell Builders, Walkspace developed and fabricated the stands for the New Te Kahu Park sports facility in Wigram. The project was a first for us working with new clients and in a new region which we are extremely proud to be associated with.

Bike racks are a key to any public space as they reaffirm and promote an alternative transportation method to the site. We believe they are a critical component to any public space however for them to be fully utilised by the public freely and effectively they need to be durable and secure. Constructed from S/S 316 the bike racks offer supreme durability, weather resistance and as the bike rack width is larger than standard, the stand offers the user full lock ability to secure both front and rear wheels further reducing any chance of theft.

As always if you require any further information in regards to this project, please do not hesitate to contact us
